

CAS#90-64-2

iWHITE MA

CHEMICAL EXFOLIATOR. SKIN TURNOVER
AGENT MANDELIC ACID

- Acne treatments
- Antiaging as well as whitening products
- Melasma treatments
- Make-up products such as skin lightener/skin fader

As an alpha hydroxy acid, Mandelic acid works by breaking up the bond between skin cells, leading to an increased rate of cellular turnover. This is beneficial because it purges the skin of dead skin cells, which can lead to wrinkles, hyperpigmentation and acne, among other conditions. Mandelic acid has also long been known to have antibacterial properties, which are especially beneficial in the treatment of acne and oily skin.

Mandelic acid is considered a great alternative to steroids and hydroquinone in the treatment of hyperpigmentation such as Melasma as it has none of the side effects found with those treatment types; however, for skin that can tolerate the presence of hydroquinone, the combination of hydroquinone and Mandelic acid resulted in even faster break up of Melasma.

SKIN TURNOVER MECHANISM OF ACTION

iWHITE MA

Application

- Acne treatments
- Antiaging as well as whitening products
- Melasma treatments
- Make-up products such a skin lightener/ skin fader

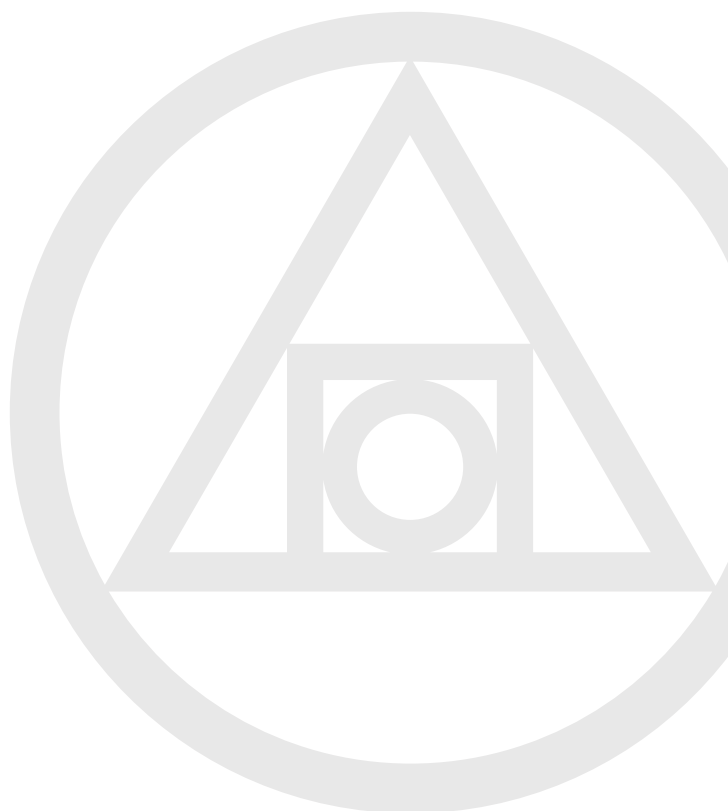

Formulation instructions

Recommended dosage

1.0 – 10.0 % of iWhite MA

Technical Data

Contents	iWhite MA
Aspect	Crystal powder
Color	White
Melting point	118 – 121°C
Assay	More than 99%
Additives	Preservatives: No applicable
